

## COURT FAVORS BANKER WALSH

Petition to Cancel Bail and Take Him Into Custody is Denied Today.

## APPEAL TO SUPREME COURT

Chicago Banker Convicted of Misuse of Funds Will Retain Liberty Under Bond, Pending Appeal to Supreme Court to Highest Tribunal in Country.

Chicago, Oct. 28.—John R. Walsh, whose conviction of misuse of the funds of the Chicago National bank, was recently affirmed by the United States appellate court may remain at liberty under bonds pending an attempt to appeal his case to the supreme court of the United States. The decision making this possible was rendered in the appellate court today when Judge Grosscup denied the petition of the government to have the Walsh bond of \$50,000 cancelled. Walsh, however, must remain in Chicago.

The government's petition set forth that Walsh, with a sentence of five years' imprisonment confronting him, and with plenty of money at his command, could well afford to leave the country, repaying his bondsmen.

In answer, the counsel for the defendant, among other things, pledged Walsh's word that he would not attempt to leave the United States and that should his petition for a rehearing by the appellate court be denied and the supreme court go against him he would at once surrender himself.

It has been wrongfully stated, so The News is informed, that the object is to place in nomination and select any particular representative of a nationality. ## Taft is Entertained.

Greenville, Miss., Oct. 28.—The president last night was entertained at a dinner on board the steamer Quincy by a party composing a congressional delegation to the waterways convention. He and Speaker Cannon again expressed their views on waterways improvement, the president favoring the bond idea. The speaker is not yet converted to the president's idea and declared last night he'd never vote for any improvement project which did not call for continuing contract work, to be paid for year to year. Cannon said he favored bonds when necessary in war or in peace to keep public faith, but if congress voted to satisfy every demand for bonds for highways and other projects there'd be another debt equal to that of the civil war.

## POLICE ATTEMPT TO GET GEBHARDT TO ADMIT MORE

Man Who Has Already Owned Up to Killing One Wife and Who is Suspected of Making Away With Others is Subjected to Close Pressure by the Authorities Today.

New York, Oct. 28.—Pressure by the police, which has already forced from Frederick Gebhardt, alias Otto Mueller, intimations that he may have done away with other wives besides Anna Luther, for whose killing he is now imprisoned, was again applied today to the man who is believed by the authorities to have made a business of marrying women and putting them out of the way for their money. The authorities today were working on the theory that at least three more crimes like that which Gebhardt committed at Islip could be traced to his door. In this connection they are investigating the story told them that Gebhardt, under the name of Mueller, was the man who had in 1906 induced his boarding mistress in Jamaica, L. I., Mrs. Mary Katz, to sell out her boarding house and turn the money over to him, as well as to make him the beneficiary of her life insurance policy. Three days later she was found dead in Jersey City and there were no signs of Mueller.

## CORDOVA.

At the mine of the Cordova Copper company development work is going steadily forward in the Sullivan shaft. On the 475-foot level the crosscut running northeast is now out thirty feet from the shaft. While this crosscut is not yet in ore of commercial grade, the showings are growing more favorable every day.

The ground in which the work is now being done contains considerable chalcocite and the face of the crosscut at present shows much better material than has been encountered heretofore. At the present rate it should not be long before the Cordova develops a commercial ore body and takes place in the list of mines with assured futures that the Miami district already has.

About thirty men are employed at the Cordova mine.—Silver Belt.

New York, Oct. 28.—A number of deals, now under way and which are said to have received the sanction of the parties interested, will considerably alter the personnel of several major league baseball clubs next season.

Manager McGraw of the New York Nationals, has arranged to trade pitcher George Witte and a substantial check to the Chicago Nationals for Johnny Kling, the catcher who refused to play with Chicago last season, according to an undoubted authority. Mike Donlin, who could not make satisfactory financial arrangements with McGraw last season, will go to Philadelphia, in exchange for Sherwood McGee, according to the same authority and Fred Merkle and Charles Herzog, two of the likeliest youngsters in the big company are to go to St. Louis in exchange for Ed Konetchy.

McGraw has refused to make public any details of the deal with Chicago but it is understood that to get Kling he was compelled to offer Witte, who is liked by Manager Frank Chance and \$7,500 besides, thus making Kling a \$15,000 asset. It is figured that these three deals will materially strengthen the four teams involved.

## DEATH FOR TWO; ELEVEN INJURED

Incendiary Fire in a New York Tenement is Attended With Fatal Results.

New York, Oct. 28.—Fred Dietz and a wife were killed and eleven injured in a fire which swept through a three-story tenement at Fifteenth street and Third avenue before daylight today.

Fire Chief Croker, stated that he believed an incendiary had set the place on fire and the police started an investigation. When the firemen reached the building the flames were extending from the basement into the upper halls and it was some time before they could get into the apartments. Firemen who entered the third floor by means of a ladder from the street found the bodies of Mr. and Mrs. Frederick Dietz. After being awakened they had apparently sought escape by the door and on opening it were overcome by smoke and flames and quickly suffocated.

Several persons did not wait till the firemen arrived and leaped from the windows and were injured. Others were injured by falling from fire escape in the rear. Ambulances conveyed the injured to Bellevue hospital, where, it is said, none of them was mortally hurt. A number of them suffered from severe burns.

## GREAT CRUISER IS LAUNCHED

Only Funnelless Craft of Its Kind is Nearing Completion for England.

## IS LARGEST IN THE WORLD

Most Remarkable Innovation in Her Construction is Introduction of Internal Combustion Engines—France Launches the New Battleship Mirabeau at Lorient Today.

London, Oct. 28.—The armored cruiser Indefatigable, which is officially described as "the world's largest cruiser," was successfully launched today at Devonport, where her keel was laid down only last February. The launching was attended by the customary ceremonies and was witnessed by a large crowd of spectators.

The Indefatigable is the first of the type of funnelless cruisers built for the British navy. In some respects she is similar to the Invincible class in that her armament and speed will be the same, but there the similarity practically ends. The Indefatigable is 570 feet long, 80 feet beam and of 18,000 tons displacement.

She will possess two tripod masts, but apart from her gun turrets and bridges, her upper deck will be perfectly clear. The most remarkable innovation in her construction, and the one which will enable her to be built without funnels, is the introduction of internal combustion engines as the propelling power. There is some talk of 15-inch guns, but there is no official confirmation of any departure from the armament of the Invincible, which carries eight 12-inch guns.

## Cruiser Plans Are Stolen.

London, Oct. 28.—Discussing the recent rumor in the house of commons today, Reginald McKenna, the first lord of the admiralty, admitted the confidential drawings having to do with the construction of the dreadnought cruiser Indefatigable, had disappeared. He added, however, that as the British cruiser has been in commission for some time the missing plans had lost much of their value. The loss of the sketches has resulted in the usual suggestion that they found their way into the hands of the German government, but as far as known this is surmise purely.

## French Battleship Launched.

Paris, Oct. 28.—The battleship Mirabeau, which is designed to be a most formidable addition to the new French navy, was launched today at Lorient. She is a vessel of 18,027 tons, and will be armed with four 12-inch and twelve 9.4-inch guns, giving her a greater weight of gunfire than the British battleship Dreadnought. The Mirabeau is one of a class of six, of which she is the fifth to be launched. It is planned to have all of them completed within the next eighteen months.

## ACID ON BALLOT BOX.

London, Oct. 28.—Mrs. Chapin, suffragette, furnished an early morning thrill at the Bermondsey election today, when she smashed a bottle of corrosive acid upon the ballot box. Her intention evidently was to destroy the ballots in the box as a protest against the exclusion of women from franchise. What she accomplished was a painful burning of some of the election officers and her own arrest.

## INDUSTRIAL PEACE WORKERS TO GIVE PRIZE FOR ESSAYS

Board of Trustees of Foundation for Promotion of Industrial Peace Assembles in Washington for Important Meeting—Basis of Fund is \$40,000 Donated by Roosevelt.

Washington, Oct. 28.—The board of trustees of the Foundation for the Promotion of Industrial Peace, which includes in its membership, Chief Justice Fuller, Secretary Nagel, John Mitchell, Seth Low and other men of national prominence, assembled here today for the most important meeting held since the inception of the movement. The principal topics scheduled for discussion are the framing of by-laws and the advisability of using a portion of the income of the fund as a prize for essays on the best method for bringing about peace in industrial pursuits.

The basis of the foundation is the fund of \$40,000 which President Roosevelt received in 1906 from the Alfred Nobel fund for his efforts in bringing about peace between Russia and Japan. Mr. Roosevelt promptly turned over the \$40,000 to be used as a foundation for the promotion of industrial peace. The fundamental idea is to form a permanent body composed of men representing all elements, in which capital and labor and the general public will have absolute confidence. When differences arise they will be presented to this body, whose judgment, it is believed, will be final and binding on every interest involved in the controversy.

## FINDS HIS SON AND WIFE DEAD

Chicago Man Makes Ghastly Discovery on Return Home; Suicide Suspected.

Chicago, Oct. 28.—Mrs. Charles H. Edgecomb and her four-year-old son, Charles H. Edgecomb, were found dead in bed in their home today by the husband and father. The room where the two lay was filled with gas which had escaped from an open jet. Edgecomb says the home life was happy and there was no reason for suicide. Edgecomb insists the gas jet must have been opened accidentally, but the police hold a contrary opinion and base it on the fact that the apartment was ordinarily lighted with electricity. Other residents of the building noticed the odor of gas yesterday afternoon but no investigation was made and the discovery of the dead mother and son was not made until Edgecomb returned to his home today. He declares there was no motive for his wife to make away with herself as their home life was happy and she was not suffering from any illness.

## RUSSIAN DOUMA PLANS REFORMS

What Promises to be Important Session of Legislative Body Opens Today.

## MANY IMPORTANT MEASURES

Several Bills Having to Do With Religious Toleration are Pending and Agrarian Law for Dissolution of Peasant Communes Will be Considered—Finish Matters Also Up.

St. Petersburg, Oct. 28.—The session of the Douma which convened today promises to be marked by legislation of a highly important character. The session, in fact, will be the most important since the creation of the parliamentary body in 1905. Though a number of eagerly desired reforms, such as the law on inviolability of person and the reform of the local self-administration, have been deferred for tactical reasons, the program prepared for the session comprises a number of measures of high importance, headed by the consolidation of rural holdings bill, the creation of local law courts, the responsibility of officials before the ordinary courts, the inheritance and income tax measures and the bill for universal primary education.

One of the first resolutions the Douma will be asked to take is the extension of Russia's military administration to Finland, bringing its nearest province Viborg under direct control of St. Petersburg. Other measures that will receive early attention include one for the reorganization of fishery rights on interior lakes and rivers and the measure for normal hours of labor for handworkers, providing for a twelve-hour day, with two hours deducted for meals and three hours for school attendance for employees of school age.

The upper house will be busy with the all-important agrarian law for the dissolution of peasant communes, which passed the Douma at the spring session, the several measures on religious toleration, and the bill reducing the long list of civic and religious holidays. The agrarian law, it is expected, will be adopted without trouble. The toleration bills will probably be passed in a modified form, but the proposal for the reduction of holidays seems doomed to a failure, as the whole weight of the Orthodox hierarchy is being thrown against it.

The consolidation of rural holdings bill, which is next on the program, will be pushed through as quickly as possible. The bill is regarded as one of the most important on the agenda. The peasant holdings are at present often split up and scattered in small areas over the lands belonging to private owners or the state, preventing economical working. The bill authorizes the consolidation of these areas by exchange with owners of adjacent lands.

Financial measures, including the inheritance and income tax bills, and the measure for the reform of the local courts will round out the big work of the session. In addition there are several hundred minor bills awaiting discussion.
